

RTS 27 Now. We can show you the way. Thomson Reuters Best Execution Reporting Service

On 1 August 2018 the European Securities and Markets Authority (ESMA) published the equities and bonds thresholds for systematic internaliser (SI) determination. With a tight timeline from determination to best execution reporting the race is on to prepare and comply.

We can show you the way.

Thomson Reuters is ideally positioned to support your best execution needs as a market leader in real-time and end-of-day data, along with providing class leading best execution solutions.

RTS 27 Now Benefits:

- **We understand the rapid timeline you face with producing your initial RTS 27 report.**
We provide a service based solution with our market expertise to get you there.
- **We understand your long term vision.**
Our service provides full implementation of our Velocity Analytics platform to support your on-going reporting needs.

About Velocity Analytics:

Our Velocity Analytics Platform, winner of this year's RegTech award for best *Best Execution Solution*, addresses key MiFID II challenges faced by financial firms, including Best Execution Reporting, Best Execution Monitoring and SI Determination.

Velocity Analytics has the necessary data models to capture cross-asset orders, executions and quotes. The platform ingests referential data from Thomson Reuters DataScope to provide ISIN's, CFI and Subclass definitions to produce RTS 27 reports in a standard format.

Velocity Analytics is a high performance trading analytics platform, powered by Kx, covering the entire trading lifecycle.
